SUSTAINABLE FUTURES TRAININGS

CERTIFICATE OF ATTAINMENT

This is to certify that

has attended and successfully completed the course assessment and examination for the

ESSENTIALS OF CARBON TRADING & REPORTING

This program provides a comprehensive introduction to India's Carbon Credit Trading Scheme (CCTS), 2023, delivered through listed, structured, self-paced modules of carbon market and climate compliance requirements, covering carbon credit calculations, greenhouse gas (GHG) accounting, emissions monitoring and reporting, compliance requirements, verification processes, carbon market operations, and industrial decarbonization strategies. Through practical case studies and real-world examples, participants develop the foundational knowledge required to understand carbon markets, support climate compliance initiatives, and contribute to sustainability, ESG, and carbon management programs across organizations.

This program included a written examination and competency assessment covering India's Carbon Credit Trading Scheme (CCTS), 2023, carbon credit calculations, GHG accounting principles, emissions monitoring and reporting, regulatory compliance requirements, verification processes, carbon market mechanisms, industrial decarbonization strategies, and the practical application of carbon management and climate compliance principles.

Duration : **5 Hours**

Mode: **E-Learning, Video-based, Self-paced**

Overall Grade:

Training Program : ESSENTIALS OF CARBON TRADING & REPORTING

This transcript records the curriculum and assessment activities completed by the participant under the Essentials of Carbon Trading & Reporting Program. The program builds awareness of India's Carbon Credit Trading Scheme (CCTS), 2023, GHG reporting, carbon credit calculations, compliance requirements, and practical carbon market responsibilities.

The training is delivered as a structured self-paced e-learning program covering GEI targets, emissions monitoring, reporting, verification readiness, carbon trading, environmental compensation, global carbon markets, and decarbonization planning through practical examples and knowledge checks

Course Curriculum	Description
Introduction to CCTR	Introduces India's carbon market, CCTS 2023, carbon credit basics, reporting, trading, and compliance concepts for beginners.
Charting India's Energy & Climate Journey	Explains India's energy transition, climate goals, Energy Conservation Act, and the legal foundation of CCTS 2023.
Understanding Greenhouse Gas Emission Intensity (GEI) Targets	Covers GEI targets, baseline emissions, reduction pathways, BEE methodology, and verification requirements
Indian Carbon Market Compliance Framework	Explains registration, monitoring, reporting, trading, banking, surrender, and compliance cycle under CCTS.
Carbon Credit Trading Scheme (CCTS), 2023	Explains carbon credit certificate calculations based on achieved GEI performance versus prescribed targets.
Why Purchase Carbon Credits?	Explains the balance between environmental protection and socio-economic development.
Environmental Compensation for GEI Non-Compliance	Covers penalties, CPCB compensation rules, payment timelines, and legal enforcement for GEI non-compliance.
India's Carbon Credit Trading Scheme: A New Chapter	Introduces CCTS implementation and its role in industrial emissions reporting and market-based compliance.
Emissions Exclusions & Boundary Definitions Under CCTS	Explains included and excluded emissions, renewable exclusions, biogenic emissions, and operational boundaries.
Developing a GHG Monitoring Plan – Bharat Cement Case Study	Guides learners in preparing a GHG monitoring plan using an industrial cement case study.
Designing Monitoring Systems & Reporting Procedures	Covers data collection, sampling, QA/QC, documentation, and emissions reporting workflows.
Fundamentals of GHG Accounting & Emission Calculations	Explains emission factors, activity data, carbon content, oxidation factors, and CO_2e calculations.
Scope 2 Emissions & Indirect Emissions Monitoring	Explains Scope 2 emissions from purchased electricity, steam, and indirect energy use.
Monitoring Activity Data & Industrial Emissions Tracking	Covers fuel tracking, meter readings, stock reconciliation, production data, and operational emissions records.
GHG Reporting Systems, QA/QC & Compliance Documentation	Explains reporting templates, QA/QC systems, documentation controls, audit trails, and record management.
Preparing Industrial GHG Emissions Reports	Guides learners in preparing industrial GHG emissions reports and compliance submission documents.
Verification Readiness & Carbon Audit Preparation	Covers audit preparation, verification documents, calibration records, internal controls, and verifier requirements.
Global Carbon Markets & International Climate Frameworks	Introduces global carbon markets, Kyoto Protocol, Paris Agreement, Article 6, EU ETS, and China ETS.
Carbon Credit Trading, Market Operations & Commercial Strategy	Explains carbon trading platforms, registries, pricing, market risks, banking, and commercial strategies.
Carbon Project Development & Offset Mechanisms	Introduces carbon offset projects, additionality, validation, verification, and standards like Verra and Gold Standard.
Developing Low-Carbon Action Plans & Decarbonization Strategies	Covers industrial decarbonization strategies, energy efficiency, fuel switching, renewables, and reduction roadmaps.
Calculating Type II Emission Factors & Industrial Emission Intensity	Explains Type II emission factors, direct and indirect emissions, and industrial emission intensity calculations.
Integrated Carbon Compliance & Decarbonization Assessment	Combines carbon calculations, reporting, verification, trading, and decarbonization into one practical assessment.'

This transcript forms an integral part of the Certificate of Attainment and must be read in conjunction with it.
