SUSTAINABLE FUTURES TRAININGS

CERTIFICATE OF ATTAINMENT

This is to certify that

has attended and successfully completed the course assessment and examination for the

ISO 14001:2015

EMS LEAD AUDITOR COURSE

This certificate fulfills the training requirements for qualification as an ISO 14001:2015 Environmental Management Systems (EMS) Lead Auditor. Training and assessment, delivered through listed, structured, self-paced modules of ISO 14001:2015 EMS requirements and lead auditing practices, were conducted in accordance with the requirements of ISO 14001:2015 (Environmental Management Systems – Requirements with Guidance for Use). This course included a written examination and competency assessment covering EMS requirements, environmental aspects and impacts, compliance obligations, risk and opportunity management, audit planning and preparation, audit execution, audit reporting, nonconformity evaluation, corrective actions, follow-up activities, and the application of audit principles and professional judgment in accordance with internationally recognized auditing practices.

This certificate fulfills the training requirements for qualification as an ISO 14001:2015 EMS Lead Auditor.

Duration : **10 Hours**

Training Program : ISO 14001:2015 EMS LEAD AUDITOR COURSE

This transcript outlines the curriculum and assessments completed under the ISO 14001:2015 Lead Auditor Training Course, aligned with ISO 14001:2015 requirements, ISO 19011 auditing guidelines, and internationally recognized environmental management practices. The course covers EMS implementation, environmental aspects and impacts, compliance obligations, risk-based thinking, operational control, audit planning, audit execution, nonconformity reporting, corrective action, management review, and continual improvement to strengthen EMS audit competence and environmental performance.

Course Curriculum	Description
Aim of an Environmental Management System (EMS)	Presents the purpose of EMS in enhancing environmental performance, compliance, and organisational sustainability.
Role of Environmental Policy	Covers how environmental policy guides organisational commitments, compliance obligations, objectives, and continual improvement.
Benefits of EMS for an Organisation	Highlights key organisational benefits of EMS, including compliance, efficiency, risk reduction, and reputation enhancement.
Role of Top Management in Achieving EMS	Outlines leadership responsibilities in supporting EMS implementation, resource allocation, accountability, and environmental performance
EMS System for an Organisation	Describes the essential elements required to establish, implement, maintain, and improve an organisational EMS
Relationship between Environmental and Socio-Economic Needs	Examines the balance between environmental protection, social responsibility, and economic development needs
Developing an Organisation EMS Framework Based on PDCA	Covers the PDCA approach for building a structured, effective, and continually improving EMS framework.
Different Terms Related and Their Understanding	Introduces essential EMS and ISO 14001 terminology to support accurate understanding and practical application.
Role of Organisation and Interested Parties	Addresses organisational context and interested party expectations in defining EMS responsibilities and priorities.
Determining the Scope of an Organisation	Covers how organisations define EMS scope based on activities, services, boundaries, and compliance obligations.
Top Management Commitment to Comply with ISO 14001	Outlines how top management demonstrates commitment, leadership, accountability, and support for ISO 14001 compliance.
Understanding Environmental Aspects	Covers identification and evaluation of environmental aspects and their significance within organisational activities.
Life Cycle Perspective	Examines how life cycle thinking supports environmental planning, operational control, and informed decision-making.
Understanding KPIs to Develop Environmental Objectives	Covers the use of measurable KPIs to establish, monitor, and improve environmental objectives
Develop an Organisation Action Plan to Achieve Environmental Objectives	Outlines how action plans define responsibilities, timelines, resources, and methods for achieving objectives
Understanding Role of Support and Competence	Covers competence, awareness, communication, and support requirements necessary for effective EMS implementation
Composition of Documented Information	Describes how documented information supports EMS control, consistency, evidence, compliance, and continual improvement
Operational Planning and Control	Covers planning and control measures required to manage environmental risks across operational activities
Planning Action	Addresses planning actions for environmental aspects, compliance obligations, risks, opportunities, and stakeholder expectations
Monitoring, Measurement, Analysis and Evaluation	Covers performance monitoring, measurement, analysis, and evaluation to verify EMS effectiveness and compliance
Emergency Preparedness and Response	Outlines how organisations prepare for, respond to, and review environmental emergency situations effectively.
Internal Audit Programme	Covers planning and conducting internal audits to evaluate EMS conformity, effectiveness, and improvement needs
Balancing Risks, Opportunities, and Stakeholder Needs in ISO 14001 Management Reviews	Examines how management reviews assess risks, opportunities, stakeholder needs, and environmental performance outcomes
Mastering Nonconformity Disclosure and Corrective Action in EMS	Covers identification, disclosure, correction, and corrective action processes for EMS nonconformities
Leveraging Management Review Insights for EMS Transformation	Highlights how management review outcomes support strategic decisions and drive EMS improvement.
Driving Continuous EMS Excellence Through Effective Nonconformity Management	Covers effective nonconformity management to strengthen EMS performance, accountability, and continual improvement.
Crafting a Management Review Plan for Continuous Environmental Improvement	Outlines the preparation of structured management review plans that support sustained environmental improvement.
ISO 19011:2018 Guidelines for Auditing Management Systems **(44 Modules Covering)**	This Course Builds professional competence in ISO 19011 audit programme management, covering audit principles, objectives, scope, risks, resources, responsibilities, records, monitoring and continual improvement. Applies these skills to ISO 14001 audits through risk-based planning, auditee communication, evidence collection, findings, closing meetings, reporting, audit methods and sampling.

This transcript forms an integral part of the Certificate of Attainment and must be read in conjunction with it.
