CERTIFICATE OF ATTAINMENT

This is to certify that

has attended and successfully completed the course assessment and examination for the

ISO 22000:2018 FSMS & PRP IMPLEMENTATION COURSE WITH INTERNAL AUDITOR TRAINING

ISO 22000:2018 FSMS & PRP Implementation Course with Internal Auditor Training is designed as a self-paced online course, delivered through listed, structured, self-paced modules covering the specified learning areas, to provide learners with comprehensive knowledge and practical competence in Food Safety Management Systems (FSMS), prerequisite programme (PRP) implementation, hygiene and sanitation controls, contamination prevention, traceability, monitoring, verification, corrective action, and internal auditing.

This certificate demonstrates successful completion of the prescribed training and assessment requirements for competence in the implementation, maintenance, monitoring, verification, and internal auditing of an ISO 22000-based Food Safety Management System and its associated PRPs. Training and assessment were conducted in accordance with the principles and requirements of ISO 22000:2018 (Food Safety Management Systems) and ISO 19011:2018 (Guidelines for Auditing Management Systems), with emphasis on effective FSMS implementation, PRP control, food safety risk management, audit planning and execution, evaluation of conformity, corrective action, audit readiness, and continual improvement.

Duration : **15 Hours**

Mode: **E-Learning, Video-based, Self-paced**

Training Program : ISO 22000:2018 FSMS & PRP IMPLEMENTATION COURSE WITH INTERNAL AUDITOR TRAINING

This Program Transcript confirms successful completion of the ISO 22000:2018 FSMS & PRP Implementation Course with Internal Auditor Training, covering FSMS requirements, PRP implementation, hygiene and contamination controls, traceability, monitoring, corrective action, and internal auditing in alignment with ISO 22000:2018 and ISO 19011:2018.

Course Curriculum	Description
PRPs for Food Safety Management	Introduces PRPs and their role in controlling food safety risks.
FSMS Foundations	Covers the basic principles and structure of a Food Safety Management System.
PRP Controls & FSMS Evaluation	Explains PRP controls and methods for evaluating FSMS effectiveness.
ISO 22000 & PDCA Framework	Introduces ISO 22000 requirements and the PDCA management cycle
PDCA & FSMS Improvement	Applies PDCA principles to continual improvement of food safety performance
Food Safety Leadership & Culture	Explains leadership responsibility and development of a strong food safety culture
ISO 22000 Context & Leadership	Covers organizational context, interested parties, leadership, and FSMS responsibilities
Planning & Support in FSMS	Covers risk-based planning, resources, competence, communication, and documentation
Importance of Food Safety	Explains the importance of preventive food safety controls across operations
Prerequisite Programmes (PRPs)	Covers the purpose, structure, and implementation of essential PRPs
PRP Verification & Improvement	Explains verification, review, corrective action, and continual PRP improvement.
Selection of PRPs	Covers risk-based selection of appropriate PRPs for food operations
ISO 22000 Infrastructure PRPs	Introduces infrastructure requirements supporting hygienic and safe food production.
Infrastructure PRPs	Covers facility design, layout, zoning, maintenance, and contamination prevention.
Utilities & Environmental PRPs	Covers water, air, ventilation, lighting, and environmental hygiene controls.
Operational PRP Monitoring	Explains monitoring and verification of operational prerequisite controls
Operational PRP Audit & Improvement	Covers auditing, corrective action, and improvement of operational PRPs
Operational Controls & Hygiene PRPs	Covers hygiene controls required to prevent contamination during operations
Pest, Waste & Equipment Audit	Covers auditing of pest control, waste management, and hygienic equipment practices
Food Safety Contamination Controls	Covers controls for biological, chemical, physical, and allergen hazards.
Contamination Prevention	Explains practical methods for preventing cross-contamination and product contamination.
Hygiene Systems & Personnel Controls	Covers personnel hygiene, behaviour, workwear, and hygiene facilities.
Hygiene Verification & Audit	Explains verification and auditing of personnel and facility hygiene controls.
Sanitation Management Essentials	Covers cleaning, sanitization, chemical use, CIP, and COP fundamentals.
Cleaning Effectiveness & Audit	Covers sanitation verification, ATP testing, inspections, and cleaning audits.
Traceability & Emergency Response	Covers batch traceability, product recall, and emergency preparedness.
Traceability & Mock Recall	Explains trace-back, trace-forward, and practical mock recall exercises
Traceability & Emergency Verification	Covers testing and verification of traceability and emergency response systems
Monitoring & Non-Conformity Control	Covers monitoring, deviations, product holds, and non-conforming product control
Verification & Corrective Action	Explains verification, root cause analysis, correction, and corrective action
Monitoring System Effectiveness	Covers calibration, monitoring reliability, data review, and trend analysis.
ISO 19011 Auditing Fundamentals	Introduces audit principles, types, roles, scope, criteria, and evidence.
Auditing Skills & Techniques	Covers interviewing, sampling, observation, audit trails, and evidence collection
Audit Execution & Reporting	Covers opening meetings, audit execution, findings, and report preparation
	Covers non-conformity reporting, closing meetings, follow-up, and corrective action closure.

This transcript forms an integral part of the Certificate of Attainment and must be read in conjunction with it.
