CERTIFICATE OF ATTAINMENT

This is to certify that

has attended and successfully completed the course assessment and examination for the

ISO/IEC 27001:2022
ISMS IMPLEMENTER TRAINING PROGRAMME

This certificate is awarded in recognition of the successful completion of the ISO/IEC 27001:2022 Implementer Course, demonstrating practical knowledge of establishing, implementing, maintaining, and continually improving an Information Security Management System (ISMS) in accordance with ISO/IEC 27001:2022.

The participant has developed an understanding of organisational context, ISMS scope, information security policies and objectives, risk assessment and risk treatment, Statement of Applicability (SoA), Annex A controls, documented information, roles and responsibilities, and operational implementation requirements.

The course also develops practical capability in monitoring ISMS performance, supporting internal audits and management reviews, managing corrective actions, and driving continual improvement. Participants gain insight into translating ISO/IEC 27001 requirements into practical controls, processes, responsibilities, and measurable security objectives within an organisation.

Successful completion reflects the participant's ability to apply ISO/IEC 27001:2022 requirements in a structured and practical manner to support effective information security management and certification readiness. It also demonstrates readiness to contribute effectively to ISMS implementation projects, coordinate implementation activities, and support organisations in strengthening information security governance and resilience.

Duration : **16 Hours / 2 Day**

Mode: **Tutor-Led**

Training Program ISO/IEC 27001:2022 ISMS IMPLEMENTER TRAINING PROGRAMME

This Program Transcript confirms successful completion of the ISO/IEC 27001:2022 ISMS Implementer Training Programme, covering ISMS planning and implementation, organisational context, risk assessment and treatment, Statement of Applicability (SoA), Annex A controls, documented information, performance monitoring, internal audit support, management review, corrective action, continual improvement, and certification readiness in alignment with ISO/IEC 27001:2022 requirements.

Course Curriculum	Description
ISMS Implementation Planning	Planning and structuring the ISO 27001 implementation process .
Context & ISMS Scope	Identifying organisational context, interested parties, and defining ISMS boundaries.
Leadership, Policy & Objectives	Establishing responsibilities, information security policy, and measurable objectives..
Risk Assessment & Risk Treatment	Identifying, evaluating, and treating information security risks.
Statement of Applicability (SoA)	Selecting applicable controls and documenting implementation decisions.
Annex A Control Implementation	Applying organisational, people, physical, and technological controls.
ISMS Documentation	Developing and controlling policies, procedures, records, and documented information.
Operational Implementation	Implementing and controlling ISMS processes in day-to-day operations.
Competence, Awareness & Communication	Building employee competence and effective information security awareness.
Monitoring and Performance Evaluation	Measuring ISMS performance and evaluating achievement of security objectives.
Internal Audit, Management Review & Corrective Action	Evaluating conformity, addressing gaps, and supporting improvement.
Continual Improvement & Certification Readiness	Strengthening the ISMS and preparing for certification audits.

This transcript forms an integral part of the Certificate of Attainment and must be read in conjunction with it.
