SUSTAINABLE FUTURES TRAININGS

# CERTIFICATE OF ATTAINMENT

This is to certify that

has attended and successfully completed the course assessment and examination for the

## ISO/IEC 27001:2022
## ISMS LEAD AUDITOR COURSE

This advanced professional course is designed to develop the competence required to plan, conduct, manage, and lead Information Security Management System (ISMS) audits in accordance with ISO/IEC 27001:2022 requirements, ISO 19011:2018 audit guidelines, and internationally recognised auditing practices.

Participants will acquire advanced knowledge and practical skills to manage the complete audit lifecycle, including establishing audit objectives, scope, criteria, and methodologies; developing audit plans; coordinating audit activities; managing audit teams; and evaluating the effectiveness, conformity, and maturity of an organisation's ISMS.

The course enables participants to perform evidence-based assessments of information security controls, risk management processes, Statement of Applicability (SoA), documented information, operational controls, and continual improvement practices. Participants will develop expertise in audit interviews, sampling techniques, objective evidence evaluation, identification of nonconformities, preparation of audit conclusions, and effective audit reporting.

Successful completion demonstrates the participant's ability to lead ISO/IEC 27001:2022 audit engagements, evaluate ISMS performance against defined audit criteria, communicate audit results to relevant stakeholders, and support organisations in achieving and maintaining information security management excellence.

This course is intended for professionals seeking advanced competency in ISMS auditing, information security governance, risk and compliance management, and certification audit leadership, enabling them to perform audits with independence, professional judgement, and confidence.

Duration : **40 Hours / 5 Day**

Mode: **Tutor-Led**

**Overall Grade:**

**Training Program** ISO/IEC 27001:2022 ISMS LEAD AUDITOR COURSE

This Program Transcript confirms successful completion of the ISO/IEC 27001:2022 ISMS Lead Auditor Training Programme, covering advanced ISMS audit principles, audit programme management, audit planning and execution, audit scope and criteria determination, Stage 1 and Stage 2 certification audit approach, audit team management, evidence-based evaluation, risk and control assessment, conformity assessment, nonconformity identification, audit reporting, corrective action evaluation, and audit follow-up activities in alignment with ISO/IEC 27001:2022 requirements, ISO 19011:2018 auditing guidelines, and internationally recognised management system auditing practices.

| Course Curriculum | Description |
|---|---|
| ISO/IEC 27001:2022 Requirements & ISMS Framework | Develop an advanced understanding of ISO/IEC 27001:2022 requirements, ISMS structure, and its application within an organisation. |
| Fundamentals of Management System Auditing | Understand audit principles, approaches, auditor responsibilities, and professional practices based on ISO 19011:2018 guidelines. |
| Audit Principles, Ethics & Auditor Competence | Learn the principles of integrity, independence, confidentiality, evidence-based auditing, and professional judgement required for auditors. |
| Audit Programme Management | Understand how to establish, manage, and maintain audit programmes for effective ISMS evaluation. |
| Audit Planning & Preparation | Learn to define audit objectives, scope, criteria, resources, methodologies, and prepare effective audit plans. |
| Stage 1 Certification Audit Approach | Understand the purpose, methodology, and evaluation process of Stage 1 audits, including documentation and readiness assessment. |
| Stage 2 Certification Audit Approach | Learn how to conduct implementation and effectiveness assessments through detailed evidence-based certification audits. |
| Leading Audit Teams & Managing Audit Activities | Develop skills to coordinate audit teams, assign responsibilities, manage resources, and ensure effective audit execution. |
| Audit Evidence Collection & Evaluation | Apply techniques for document review, interviews, sampling, observation, and evaluation of objective evidence. |
| Information Security Risk & Control Assessment | Evaluate risk assessment processes, risk treatment activities, Statement of Applicability (SoA), and Annex A control implementation. |
| ISMS Conformity & Effectiveness Evaluation | Assess whether ISMS processes, controls, and practices conform to ISO/IEC 27001:2022 requirements and organisational objectives. |
| Audit Findings & Nonconformity Management | Identify, classify, document, and communicate audit findings, nonconformities, and opportunities for improvement. |
| Corrective Action Evaluation & Follow-up | Review corrective actions, determine effectiveness, and verify closure of identified nonconformities. |
| Audit Reporting & Communication | Prepare professional audit reports, communicate conclusions, and present audit results to relevant stakeholders.. |
| Certification Audit Leadership & Professional Practice | Develop the capability to lead complete ISMS audit engagements with independence, objectivity, and professional judgement. |

This transcript forms an integral part of the Certificate of Attainment and must be read in conjunction with it.
