CERTIFICATE OF ATTAINMENT

This is to certify that

has attended and successfully completed the course assessment and examination for the

CYBER SECURITY PHISHING AWARENESS TRAININGS

The program covered foundational principles and practices of Cybersecurity and Ethical Hacking, including information security concepts, CIA Triad, cyber threats, attacker methodologies, MITRE ATT&CK, Cyber Kill Chain, threat modeling, ethical hacking phases, information security governance, and relevant cybersecurity standards and regulatory concepts.

The participant has demonstrated foundational knowledge of identifying cyber risks, understanding attack vectors, evaluating vulnerabilities, and applying ethical hacking concepts within a legal and responsible cybersecurity environment.

Training Program : CYBER SECURITY PHISHING AWARENESS TRAININGS

The participant has successfully completed the 2-hour Cyber Security Phishing Awareness Training and has demonstrated understanding of phishing threats, email security risks, social engineering techniques, phishing identification checks, incident reporting, and organizational response measures.

This certification recognizes the participant's ability to identify suspicious communications, apply safe digital practices, and support cybersecurity awareness and phishing prevention within the organization.

Course Curriculum	Description
What is Phishing?	This module covered the concept of phishing, including how attackers impersonate trusted sources to deceive users and obtain sensitive information. Learners were introduced to common phishing methods, psychological manipulation techniques, fraudulent emails, suspicious links, fake websites, and the potential risks of phishing attacks. The module strengthened awareness of safe online behavior and helped participants identify and respond cautiously to phishing threats.
Anatomy of a Phising Email	This module covered the anatomy of a phishing email, including how attackers structure fraudulent messages to appear genuine and trustworthy. Learners were introduced to key warning signs such as suspicious sender addresses, urgent subject lines, misleading content, malicious links, and unsafe attachments. The module strengthened participants' ability to identify phishing emails and avoid actions that may compromise sensitive information or cybersecurity.
How to Identify Phishing Emails	This module covered five practical verification checks for identifying phishing emails before taking action. Learners were guided to examine sender addresses, verify unexpected attachments, identify spelling or grammar errors, recognize urgent or threatening language, and check link destinations before clicking. The module strengthened participants' ability to detect suspicious emails and apply safe email security practices.
Phishing Response & Defence Strategy	This module covered organizational response to phishing attacks, including clear roles, responsibilities, and defence strategies. Learners explored the involvement of leadership, CISO, IT security teams, managers, employees, and HR/legal teams in detecting, reporting, containing, and mitigating phishing incidents. The module also highlighted preventive controls such as awareness training, email filtering, multi-factor authentication, and phishing simulations to strengthen cybersecurity readiness.

This transcript forms an integral part of the Certificate of Attainment and must be read in conjunction with it.
