CERTIFICATE OF ATTAINMENT

This is to certify that

has attended and successfully completed the course assessment and examination for the

EU CYBERSECURITY COMPLIANCE CORE (NIS2 & DORA)

This certificate is awarded for the successful completion of the two-hour course Cybersecurity Regulation in the European Union. The participant has demonstrated an understanding of key EU cybersecurity regulatory concepts, including the NIS2 Directive, incident reporting obligations, enforcement expectations, GDPR alignment, cybersecurity governance, risk management, and organizational responsibilities for data protection and digital resilience within the EU regulatory framework. This achievement reflects the participant's commitment to maintaining awareness of evolving cybersecurity and compliance requirements within the European Union.

Duration : **2 Hours**

Training Program : EU CYBERSECURITY COMPLIANCE CORE (NIS2 & DORA)

This 2-hour course provided comprehensive and structured learning on Cybersecurity Regulation in the European Union, covering key regulatory concepts and frameworks, NIS2 Directive requirements, incident reporting obligations, enforcement expectations, and the relationship between cybersecurity regulations and GDPR. The course also addressed organizational responsibilities for cybersecurity governance, risk management, and data protection compliance, providing participants with a broader understanding of the legal and operational requirements applicable within the EU regulatory landscape.

Course Curriculum	Description
Introduction to Cybersecurity Regulation in the EU	This module provides a brief overview of the EU cybersecurity regulatory framework and its role in protecting digital infrastructure, data, and essential services, introducing key regulations and compliance concepts covered later.
Overview of the NIS2 Directive	This module provides a structured overview of the key EU cybersecurity frameworks and directives, explaining their role in strengthening digital security, risk management, incident response, and organizational compliance responsibilities across member states.
The Digital Operational Resilience Act	This module explains the NIS2 Directive, its purpose, scope, and role in strengthening cybersecurity and resilience for essential and important entities. It highlights key changes from the original NIS Directive and introduces the organizational responsibilities required for effective NIS2 compliance.
Understanding Digital Resilience	This module explains the core NIS2 security and risk management requirements, including technical and organizational controls, incident prevention and response, governance responsibilities, and management accountability for effective cybersecurity compliance.
Compliance Standards Mapping	This module explains the NIS2 incident reporting, supervision, and enforcement requirements, including reporting timelines, communication obligations, the role of competent authorities and CSIRTs, and the importance of accountability, preparedness, and cooperation for regulatory compliance.
Completion and Final Assessment of Cybersecurity Regulation in the EU	This module explains the relationship between GDPR and EU cybersecurity regulations, highlighting how data protection, cybersecurity incident management, and NIS2 obligations work together to protect personal data, reduce compliance risk, and strengthen organizational security resilience.

This transcript forms an integral part of the Certificate of Attainment and must be read in conjunction with it.
