CERTIFICATE OF ATTAINMENT

This is to certify that

has attended and successfully completed the course assessment and examination for the

ISO 14001:2015 EMS INTERNAL AUDITOR COURSE

This certificate fulfills the training requirements for qualification as an ISO 14001:2026 Environmental Management Systems (EMS) Internal Auditor. Training and assessment, delivered through listed, structured, self-paced modules of ISO 14001:2026 EMS requirements and internal auditing practices, were conducted in accordance with the requirements of ISO 14001:2026 (Environmental Management Systems – Requirements with Guidance for Use).

This course included a written examination and competency assessment covering EMS requirements, environmental aspects and impacts, compliance obligations, risk and opportunity management, audit planning and preparation, audit execution, audit reporting, nonconformity evaluation, corrective actions, follow-up activities, and the application of audit principles and professional judgment in accordance with internationally recognized auditing practices.

This certificate fulfills the training requirements for qualification as an ISO 14001:2026 EMS Lead Auditor.

Training Program : ISO 14001:2015 EMS INTERNAL AUDITOR COURSE

This 10-hour course provided comprehensive training on ISO 14001:2015 Environmental Management Systems, covering EMS principles, environmental policy, aspect and impact evaluation, legal compliance, operational controls, performance monitoring, internal audits, management review, corrective action, and continual improvement. The learner successfully completed the required training and assessment, demonstrating understanding of EMS implementation, evaluation, and improvement practices aligned with ISO 14001 and ISO 19011 guidelines.

Course Curriculum	Description
Aim of an Environmental Management System (EMS)	Explains the purpose of EMS for environmental performance and compliance
Role of Environmental Policy	Covers how policy guides EMS commitments, objectives, and improvement
Benefits of EMS for an Organisation	Highlights EMS benefits such as compliance, efficiency, and risk reduction
Role of Top Management in Achieving EMS	Explains leadership responsibilities in supporting EMS implementation and performance
EMS System for an Organisation	Covers the key elements required to establish and maintain EMS
Relationship between Environmental and Socio-Economic Needs	Explains the balance between environmental protection and socio-economic development.
Developing an Organisation EMS Framework Based on PDCA	Covers PDCA-based planning, implementation, evaluation, and continual improvement
Different Terms Related and Their Understanding	Introduces essential EMS and ISO 14001 terms
Role of Organisation and Interested Parties	Explains organisational context and stakeholder expectations in EMS.
Determining the Scope of an Organisation	Covers how to define EMS boundaries and applicable requirements.
Top Management Commitment to Comply with ISO 14001	Explains leadership commitment toward ISO 14001 compliance and EMS effectiveness.
Understanding Environmental Aspects	Covers identification and evaluation of environmental aspects and impacts
Life Cycle Perspective	Explains how KPIs support measurable environmental objectives
Understanding KPIs to Develop Environmental Objectives	Covers planning actions to achieve defined environmental objectives
Develop an Organisation Action Plan to Achieve Environmental Objectives	Explains life cycle thinking for environmental control and improvement
Understanding Role of Support and Competence	Covers resources, competence, awareness, and EMS support requirements.
Composition of Documented Information	Explains documented information for EMS control and audit readiness.
Operational Planning and Control	Covers operational controls to manage environmental risks and impacts
Planning Action	Explains actions for risks, opportunities, obligations, and objectives.
Monitoring, Measurement, Analysis and Evaluation	Covers evaluation of EMS performance through monitoring and analysis
Emergency Preparedness and Response	Explains emergency planning to reduce environmental impacts during incidents.
Internal Audit Programme	Covers audit planning to assess EMS conformity and effectiveness
Risks, Opportunities, and Stakeholder Needs in Management Reviews	Explains review of risks, opportunities, stakeholder needs, and EMS performance.
Non conformity Disclosure and Corrective Action in EMS	Covers identification, reporting, correction, and prevention of EMS nonconformities
Management Review Insights for EMS Transformation	Highlights how management review outcomes support strategic decisions and drive EMS improvement.
Continuous EMS Excellence Through Nonconformity Management	Covers continual improvement through effective nonconformity management.
Management Review Plan for Environmental Improvement	Explains structured review planning for continuous environmental improvement.
ISO 14001:2015 to 2026 Transition Training Course (9 Modules Covering)	This course covers Intro, Clause 4 Context & Lifecycle Scope, Clause 5 Leadership & Policy, Clause 6 Planning & EMS Change Management, Clause 7 Support & Documentation, Clause 8 Operational Control, Clause 9 Auditor Verification, Clause 10 Improvement & Corrective Action, and Transition Summary with clause-wise comparison and evidence verification.
