CERTIFICATE OF ATTAINMENT

This is to certify that

has attended and successfully completed the course assessment and examination for the

ISO/IEC 27001:2022 AWARENESS COURSE

The course covered competency-based learning and practical evaluation, delivered through listed, structured, self-paced modules of ISO/IEC 27001:2022 awareness fundamentals, information security principles, the CIA triad, information asset identification and classification, risk and gap assessment, access control, password security, phishing and social engineering, incident reporting, business continuity, data retention and secure disposal, third-party and cloud security, legal and regulatory obligations, security culture, role-based responsibilities, and audit-ready implementation practices aligned with modern organizational and compliance requirements.

Duration : **3 Hours**

Mode: **E-Learning, Video-based, Self-paced**

PROGRAM TRANSCRIPT

Name :

Overall Grade:

Training Program : ISO/IEC 27001 : 2022 AWARENESS COURSE

This transcript outlines the curriculum and assessments completed under the ISO/IEC 27001:2022 Information Security Awareness Training Program, aligned with ISO/IEC 27001:2022, ISO/IEC 27002:2022, and internationally recognized information security best practices for protecting organizational data, managing risk, and building a strong security culture.

Course Curriculum	Description
Introduction to ISO 27001 Awareness Training	Introduction to the ISO 27001 Awareness Training Program, covering the fundamentals of information security, cyber risks, secure practices, and the key learning outcomes participants will achieve.
Why ISO 27001 Matters ?	This module introduces ISO/IEC 27001 and explains how every employee plays a vital role in protecting organizational information, ensuring compliance, and reducing cybersecurity risks.
What Are We Protecting ?	This module explains how to identify, classify, and protect information assets by understanding their value, sensitivity, and the roles and legal responsibilities involved in handling them securely.
CIA Triad - Deep Dive & Security Defender Games	This module introduces the CIA Triad—Confidentiality, Integrity, and Availability—and teaches learners how to assess cyber risks, identify threats, and apply layered security controls to protect organizational information.
Threats, Ransomware & Stuxnet Case	This module introduces common cybersecurity threats such as phishing, ransomware, malware, and insider attacks, and teaches learners how to recognize, prevent, and respond to them effectively.
BYOD & Pirated Software Audit	This module teaches learners how to audit personal devices and detect pirated software to identify and mitigate BYOD security risks that could compromise organizational data.
Access Control, Passwords & Data Handling	This module teaches learners how to apply access control principles, manage strong passwords, and securely protect organizational data throughout its lifecycle.
Incident Reporting: Who, What, How & Roles	This module teaches employees how to recognize, classify, and report cybersecurity incidents promptly while supporting business continuity and effective incident response.
ISO 27001 - GAP Assessment & Risk Assessment	This module introduces gap assessments, risk assessments, VAPT, and security awareness as core components of an effective ISO/IEC 27001 Information Security Management System.
Practical Checklists & Assessment	This module provides practical security checklists and assessments to help employees apply secure habits in email handling, remote work, and day-to-day activities.

This transcript forms an integral part of the Certificate of Attainment and must be read in conjunction with it.
