CERTIFICATE OF ATTAINMENT

This is to certify that

Jane Doe

has attended and successfully completed the course assessment and examination for the

FOOD DEFENSE TRAINING ALIGNED WITH FSSC 22000 : 2018 REQUIREMENTS

This Certificate is awarded in recognition of successful completion of the Food Defense Training aligned with the FSSC 22000 framework, delivered through listed, structured, self-paced modules of food defense principles and implementation requirements. The participant has demonstrated understanding of food defense principles, threat assessment, mitigation planning, incident response, human factors, training, supply chain security, and audit-ready implementation within the Food Safety Management System.

This certification reflects the participant's competence to support food defense preparedness, evaluate controls, Identify vulnerabilities, and contribute to the continual improvement of food safety and product protection practices.

Duration : **4 Hours**

Mode: **E-Learning, Video-based, Self-paced**

Issue Date : **03 August 2026**

Certificate No. : **2026-05-101-001/123**

Unique Delegate No. : **2026-0042-123**

**Program Director

PROGRAM TRANSCRIPT

Name : Jane Doe

Overall Grade: 85%

Training Program : FOOD DEFENSE TRAINING ALIGNED WITH FSSC 22000 : 2018 REQUIREMENTS

This 4 hour course provided advanced learning on Food Defense under the FSSC 22000 framework, covering threat assessment, documented food defense planning, incident response, training, human factors, and supply chain security. The participant demonstrated understanding of how to identify intentional contamination risks, evaluate mitigation controls, review objective evidence, and support audit-ready food defense implementation within the Food Safety Management System.

Course Curriculum	Description
Food Defense Fundamentals — Overview & Learning Outcomes	This module covered Food Defense under FSSC 22000 Version 6, focusing on requirements, implementation, and audit readiness. The participant gained skills in identifying intentional contamination risks, understanding key requirements, evaluating controls, and supporting effective audits and compliance.
Understanding Food Defense Threat Assessment — Scope, Methodology & Learning Outcomes	This module covered Food Defense Threat Assessment under FSSC 22000, focusing on risk-based evaluation, defined methodology, and audit-ready application. The participant gained understanding of identifying internal and external threats, analyzing vulnerable facility areas, assessing site-specific risks, and evaluating whether threat assessments are logical, documented, defensible, and suitable for audit scrutiny.
Food Defense Plan, Mitigation Measures & FSMS Integration	This module covered the development of a documented Food Defense Plan under FSSC 22000, focusing on converting threat assessment results into practical mitigation measures, verification activities, responsibilities, records, corrective actions, and review processes. The participant gained understanding of how food defense controls are integrated into the FSMS, maintained within certification scope, aligned with legal and supplier requirements, and evaluated for audit readiness.
From Assessment to a Documented Mitigation Plan	This module covered the development of a documented Food Fraud Mitigation Plan under FSSC 22000 Version 6, focusing on converting FFVA outputs into suitable controls, verification procedures, records, responsibilities, and corrective actions. The participant gained understanding of how to link mitigation measures to significant vulnerabilities, support the plan through the FSMS, maintain legal and supply-chain alignment, and verify supplier food fraud controls for FII category organizations.
Food Defense Incident Management, Response, Investigation & Recovery	This module covered Food Defense Incident Management under FSSC 22000, focusing on recognizing suspicious events, containing affected products or areas, preserving evidence, managing communication, conducting investigations, and supporting recovery decisions. The participant gained understanding of how to evaluate incident response responsibilities, product-hold actions, traceability evidence, corrective actions, post-incident review, and FSMS integration for effective food defense preparedness.
Food Defense Culture, Training, Human Factors & Supply Chain Security	This module covered Food Defense Culture, Human Factors, and Supply Chain Security under FSSC 22000, including awareness, insider-threat controls, access management, transport security, and continual improvement.

This transcript forms an integral part of the Certificate of Attainment and must be read in conjunction with it.
