CERTIFICATE OF ATTAINMENT

This is to certify that

Jane Doe

has attended and successfully completed the course assessment and examination for the

ISO 14064: MASTERING GHG ACCOUNTING & VERIFICATION

Comprehensive professional competence was developed through listed, structured, self-paced modules of ISO 14064-based greenhouse gas accounting, GHG inventory development, emission source identification, organizational and operational boundary setting, Scope 1, Scope 2, and Scope 3 emissions quantification, data collection, reporting, uncertainty management, and verification practices. Demonstrates applied understanding of carbon reporting principles, GHG calculation methodologies, assurance requirements, ISO 14065-related verification expectations, and transparent climate disclosure for effective organizational sustainability and carbon management. Develops the ability to support organizational climate strategies, regulatory compliance, and continuous improvement in environmental performance and sustainability reporting.

Duration : **11 Hours**

Mode: **E-Learning, Video-based, Self-paced**

Issue Date : **03 August 2026**

Certificate No. : **2026-05-101-001/123**

Unique Delegate No. : **2026-0042-123**

Training Program

: ISO 14064: MASTERING GHG ACCOUNTING & VERIFICATION

This 11-hour course provides a comprehensive professional understanding of ISO 14064-based greenhouse gas accounting, GHG inventory development, emission source identification, organizational and operational boundary setting, Scope 1, Scope 2, and Scope 3 emission quantification, data collection, reporting, uncertainty management, and verification practices. Learners gain practical knowledge of carbon reporting principles, GHG calculation methods, assurance requirements, ISO 14065-related verification expectations, and the importance of transparent, accurate, and credible climate disclosures for organizational sustainability and carbon management.

Course Curriculum	Description
Decoding Industrial Evolution: Balancing Growth, Sustainability, and Global Perspectives	This module explores industrial growth, sustainability challenges, and global perspectives shaping responsible environmental decision-making.
Decoding Emissions: Navigating the Paris Agreement and India's Carbon Market Dynamic	This module explains emissions governance, the Paris Agreement, and India's evolving carbon market framework
Future-Ready GHG Verification: Mastering Essential Skills, Leadership, and Data Auditing Excellence	This module develops future-ready GHG verification skills, leadership abilities, and excellence in data auditing
GHG & ISO 14064 Terminology Mastery: Empowering Effective Verification and Assurance	This module strengthens understanding of GHG and ISO 14064 terminology for effective verification assurance
GHG Emission Intelligence: Mastering Quantification, Reporting & Scope 3 Strategies	This module covers GHG quantification, reporting practices, emission intelligence, and Scope 3 management strategies
Mastering GHG Inventory Verification: From Data Collection to ISO 14065 Compliance	This module explains GHG inventory verification, data collection processes, and compliance with ISO 14065 requirements
Emission Verification Mastery: Decoding GHG Boundaries, Classifying Sources, and Confronting Challenges	This module covers emission boundaries, source classification, and practical challenges in greenhouse gas verification.
Optimizing GHG Strategies: A Case Study in Boundary-Setting, Emissions Classification, and Transparent Reporting	This module uses a case study to explain boundary-setting, emission classification, and transparent reporting.
Mastering Greenhouse Gas Accounting: Principles, Boundaries, and Transparent Reporting	This module explains greenhouse gas accounting principles, reporting boundaries, and transparent disclosure practices
Defining Boundaries: Mastering Direct & Indirect GHG Emissions	This module explains direct and indirect GHG emission boundaries for accurate organizational emissions reporting
GHG Emissions Mastery: Calculations, Quantification & Global Impact Assessment	In this module Learners will define operational and inventory boundaries and distinguish direct and indirect GHG emissions effectively.
From Emission Sources to CO ₂ Equivalents: A Data-Driven Case Study in GWP Standardization	This module covers GHG emission calculations, quantification methods, and global impact assessment approaches
Mastering GHG Quantification: Models, Methodologies, and Managing Uncertainty	This module demonstrates conversion of emission sources into CO ₂ equivalents using standardized GWP values.
Scope 1 Emissions Uncovered: Direct Source Analysis and LULUCF Foundations	This module explains GHG quantification models, methodology selection, calculation approaches, and uncertainty management
Decoding Scope 1 Emissions: A Comprehensive Analysis of Stationary, Mobile, Process-Related, and Fugitive Sources	This module covers Scope 1 emissions, direct source analysis, and LULUCF foundations.
Scope 2 Emissions Unlocked: Energy Systems, Data Mastery, and Market-Driven Strategies	This module explains stationary, mobile, process-related, and fugitive sources under Scope 1 emissions
Mastering Scope 2 Emissions: A Dual-Method Case Study in GHG Calculations	This module covers Scope 2 energy systems, emissions data management, and market-based reporting strategies
Navigating Scope 3: Fundamentals, Methodologies, and Data-Driven Emission Management	This module applies dual-method Scope 2 calculation approaches through a practical GHG case study
Scope 3 Unveiled: Strategic Insights into Subcategory Analysis and Calculation Excellence	This module explains Scope 3 fundamentals, calculation methods, data collection, and emission management practices
Mastering GHG Verification & Validation: Leading Data Integrity and Process Excellence	In this module Learners will explain, apply, and lead GHG validation and verification processes while developing assurance statements and assessing conformity

This transcript forms an integral part of the Certificate of Attainment and must be read in conjunction with it.
