CERTIFICATE OF ATTAINMENT

This is to certify that

has attended and successfully completed the course assessment and examination for the

PRP REQUIREMENTS FOR FEED AND ANIMAL FOOD PRODUCTION AS PER ISO/TS 22002-6:2016

This certificate confirms successful completion of the professional course on PRP Requirements for Feed and Animal Food Production as per ISO/TS 22002-6:2016, delivered through listed, structured, self-paced modules of the specified learning areas. The participant has demonstrated understanding of prerequisite programme requirements applicable to feed and animal food production under FSSC 22000 Category D, including facility hygiene, infrastructure controls, utilities, supplier and material management, cleaning and sanitation, pest control, personnel hygiene, process control, batching, storage, dispatch, transport interfaces, traceability, recall readiness, audit evidence collection, and nonconformity writing to support effective feed safety management system implementation.

Duration : **3 Hours**

Mode: **E-Learning, Video-based, Self-paced**

Training Program : PRP REQUIREMENTS FOR FEED AND ANIMAL FOOD PRODUCTION AS PER ISO/TS 22002-6:2016

This transcript confirms successful completion of the 3-hour course on PRP Requirements for Feed and Animal Food Production as per ISO/TS 22002-6:2016 under FSSC 22000 Category D. The participant completed structured learning on feed safety PRPs, including facility hygiene, infrastructure, utilities, supplier and material control, cleaning, sanitation, pest control, personnel hygiene, process control, batching, storage, dispatch, transport interfaces, traceability, audit evidence, and nonconformity writing to support effective feed safety management system implementation.

Course Curriculum	Description
PRP Framework for Feed and Animal Food Production	Overview of PRP requirements for feed and animal food production under FSSC 22000 Category D, including key standards and controls for hygiene, infrastructure, personnel, pest management, material handling, and process safety.
Site Environment, Infrastructure, Utilities, and Material Control	Overview of site environment, infrastructure, utilities, storage, and material control requirements for feed and animal food production, focusing on facility design, traffic flow, housekeeping, material identification, contamination prevention, and audit-based evaluation under FSSC 22000 Category D.
Supplier Control, Incoming Materials, Formulation Inputs, and Chemical Control	Overview of supplier control, incoming material verification, formulation inputs, premix handling, rework, chemical control, and nonconforming material management in feed and animal food production, with focus on documentation, traceability, contamination prevention, food fraud control, and audit evidence under FSSC 22000 Category D.
Cleaning, Sanitation, Pest Control, Personnel Hygiene & Health Status	Overview of cleaning, sanitation, pest control, personnel hygiene, and health-status requirements in feed and animal food production, focusing on housekeeping, line clearance, contamination prevention, carryover control, staff hygiene practices, illness reporting, audit evidence, and risk-based findings under FSSC 22000 Category D.
Process Control, Batching, Storage, Dispatch, Transport Interfaces, and Traceability	Overview of process control, batching, storage, dispatch, transport interfaces, traceability, and recall readiness in feed and animal food production, focusing on weighing accuracy, formulation control, sequencing, line clearance, flushing, product release, contamination prevention, carryover control, labeling accuracy, and audit evidence under FSSC 22000 Category D.
Audit Application, Evidence Collection, Nonconformity Writing, and Final Assessment	Overview of audit application for feed and animal food production PRPs, focusing on audit planning, risk-based sampling, evidence collection, conformity judgment, nonconformity writing, corrective action evaluation, final assessment preparation, and feed-safety risk evaluation under FSSC 22000 Category D.

This transcript forms an integral part of the Certificate of Attainment and must be read in conjunction with it.
